

## Out-of-the-box label printing: **FLUICS PRINT** for **SciNote**

SciNote

**FLUICS**  
PRINT

### Jump-start your label printing!

Print your first labels in only a few minutes. No configuration or coding of templates required.

1. Connect printer to Internet (LAN cable)

2. Activate the FLUICS PRINT add-on as a SciNote admin

3. Print labels from any PC, Mac, or mobile device

### What's in the box:

#### High resolution printer with a small footprint

Pixel perfect QR code printing (300 dpi) with a compact 9.7x6.9x5.3" (245x175x136 mm) footprint. No additional computer required in the lab.

#### Activation key

Connect your SciNote account through the cloud to the printer. Print labels from any PC, Mac or mobile device.

#### Best-in-class cryo labels

1,000 labels 1.0x0.5" (25.4x12.7mm), waterproof, cryo from -196°C to +110°C, ultra-permanent, blank, yellow (Type 1). Including black print ribbon and cloud print service.

#### Expert label designs

Tested print settings for optimal scan- and readability (incl. QR code, SciNote item ID, sample name).

#### Premium support

Online troubleshooting and 2 years warranty on hardware.

### One-time investment. No subscription. Only 1,220 EUR or 1,560 USD.

Additional labels starting at 0.19 EUR or 0.24 USD/label
